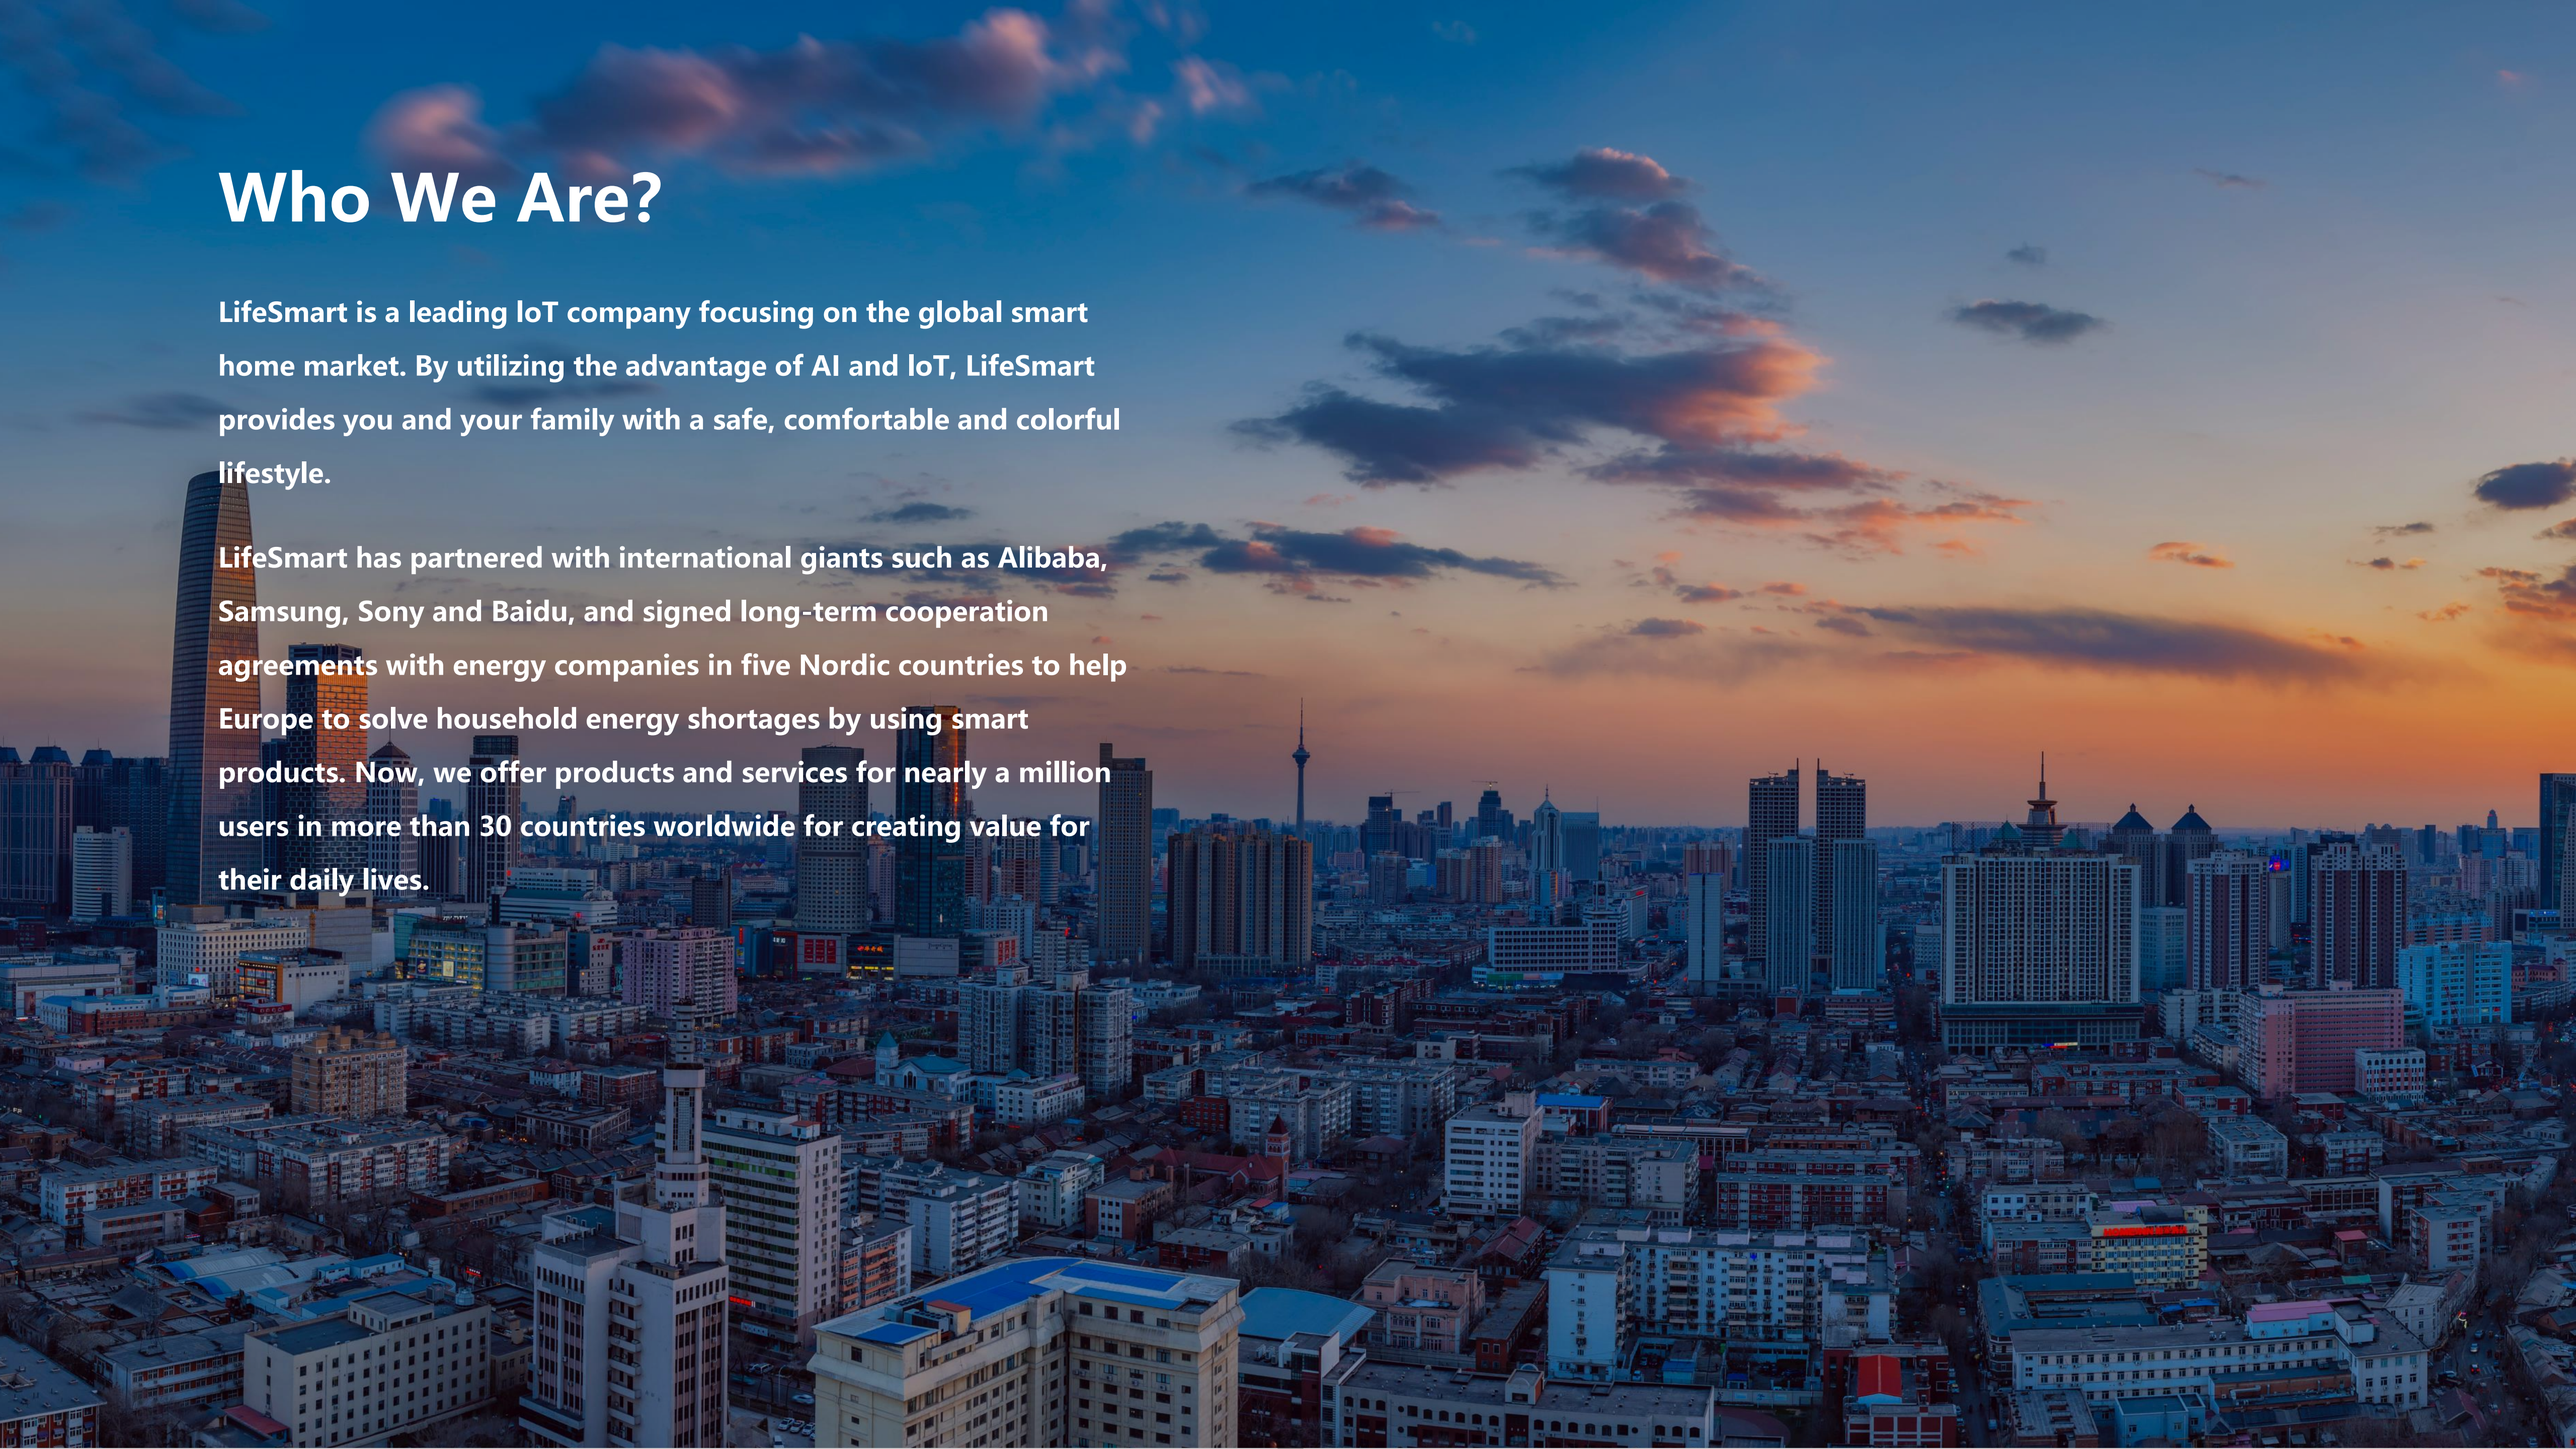
LifeSmart

Who We Are?

LifeSmart is a leading IoT company focusing on the global smart home market. By utilizing the advantage of AI and IoT, LifeSmart provides you and your family with a safe, comfortable and colorful lifestyle.

LifeSmart has partnered with international giants such as Alibaba, Samsung, Sony and Baidu, and signed long-term cooperation agreements with energy companies in five Nordic countries to help Europe to solve household energy shortages by using smart products. Now, we offer products and services for nearly a million users in more than 30 countries worldwide for creating value for their daily lives.



Our Vision and Mission

In LifeSmart, we believe that every single home will become a smart home, every single office will become a smart office.

On this regard, we dedicate our efforts on AI, cloud service, product design and development. We have the most stable and fashionable product line up in the industry, by continuing improving our user experience, we create values and make significance for customers on a global basis.

History

2013

- 1st Generation of Products

2014

- Launched Products in Tmall & JD

2015

- Set up a U.S. Branch
- Build up a Long-term Cooperation Agreements with Nordic Energy Companies
- Got A-Series Investment from Hair-SAIF Partners

2016

- Launched Full-house Smart Home Products Portfolio
- Build Strategy Cooperation with Huawei, Alibaba, SONY, BIGuiYuan
- 1st to support Apple HomeKit in China

2017

- Build the Voice Control System with Amazon Alexa, Google Home, Apple HomeKit, Tmall Genie, Rokid, Tic etc.
- Got B-Series 80MRMB investment from Walden International (Early Investors f SINA, MEITUAN, DJI) & BridgeOne Capital

2018

- List on the Hangzhou “More than 100 million U.S. Dollars (Quasi Unicorn Enterprises)”
- In-depth Cooperation with three major carriers of China Telecom, China Mobile and China Unicom.

2019

- Launch the Nature Pad
- Volume Delivery in Japan and Germany
- Cololight Honored by 2019 CES Innovation Awards

Full-fledged Product Matrix

LifeSmart owns a product line system consisting of 100-plus SKUs, covering all aspects of smart home. It can meet almost all the intelligence needs of users in their lives.

NATURE

Interactive Portal for Smart Home

Scenario Application

- Real-time indoor monitoring, and easy control of air conditioning, floor heating and other intelligent devices can be realized;
- When you back home, press one button and then curtain will be up、lights and other devices will be on automatically;
- When you leave, press again and the security system will on automatically as well.

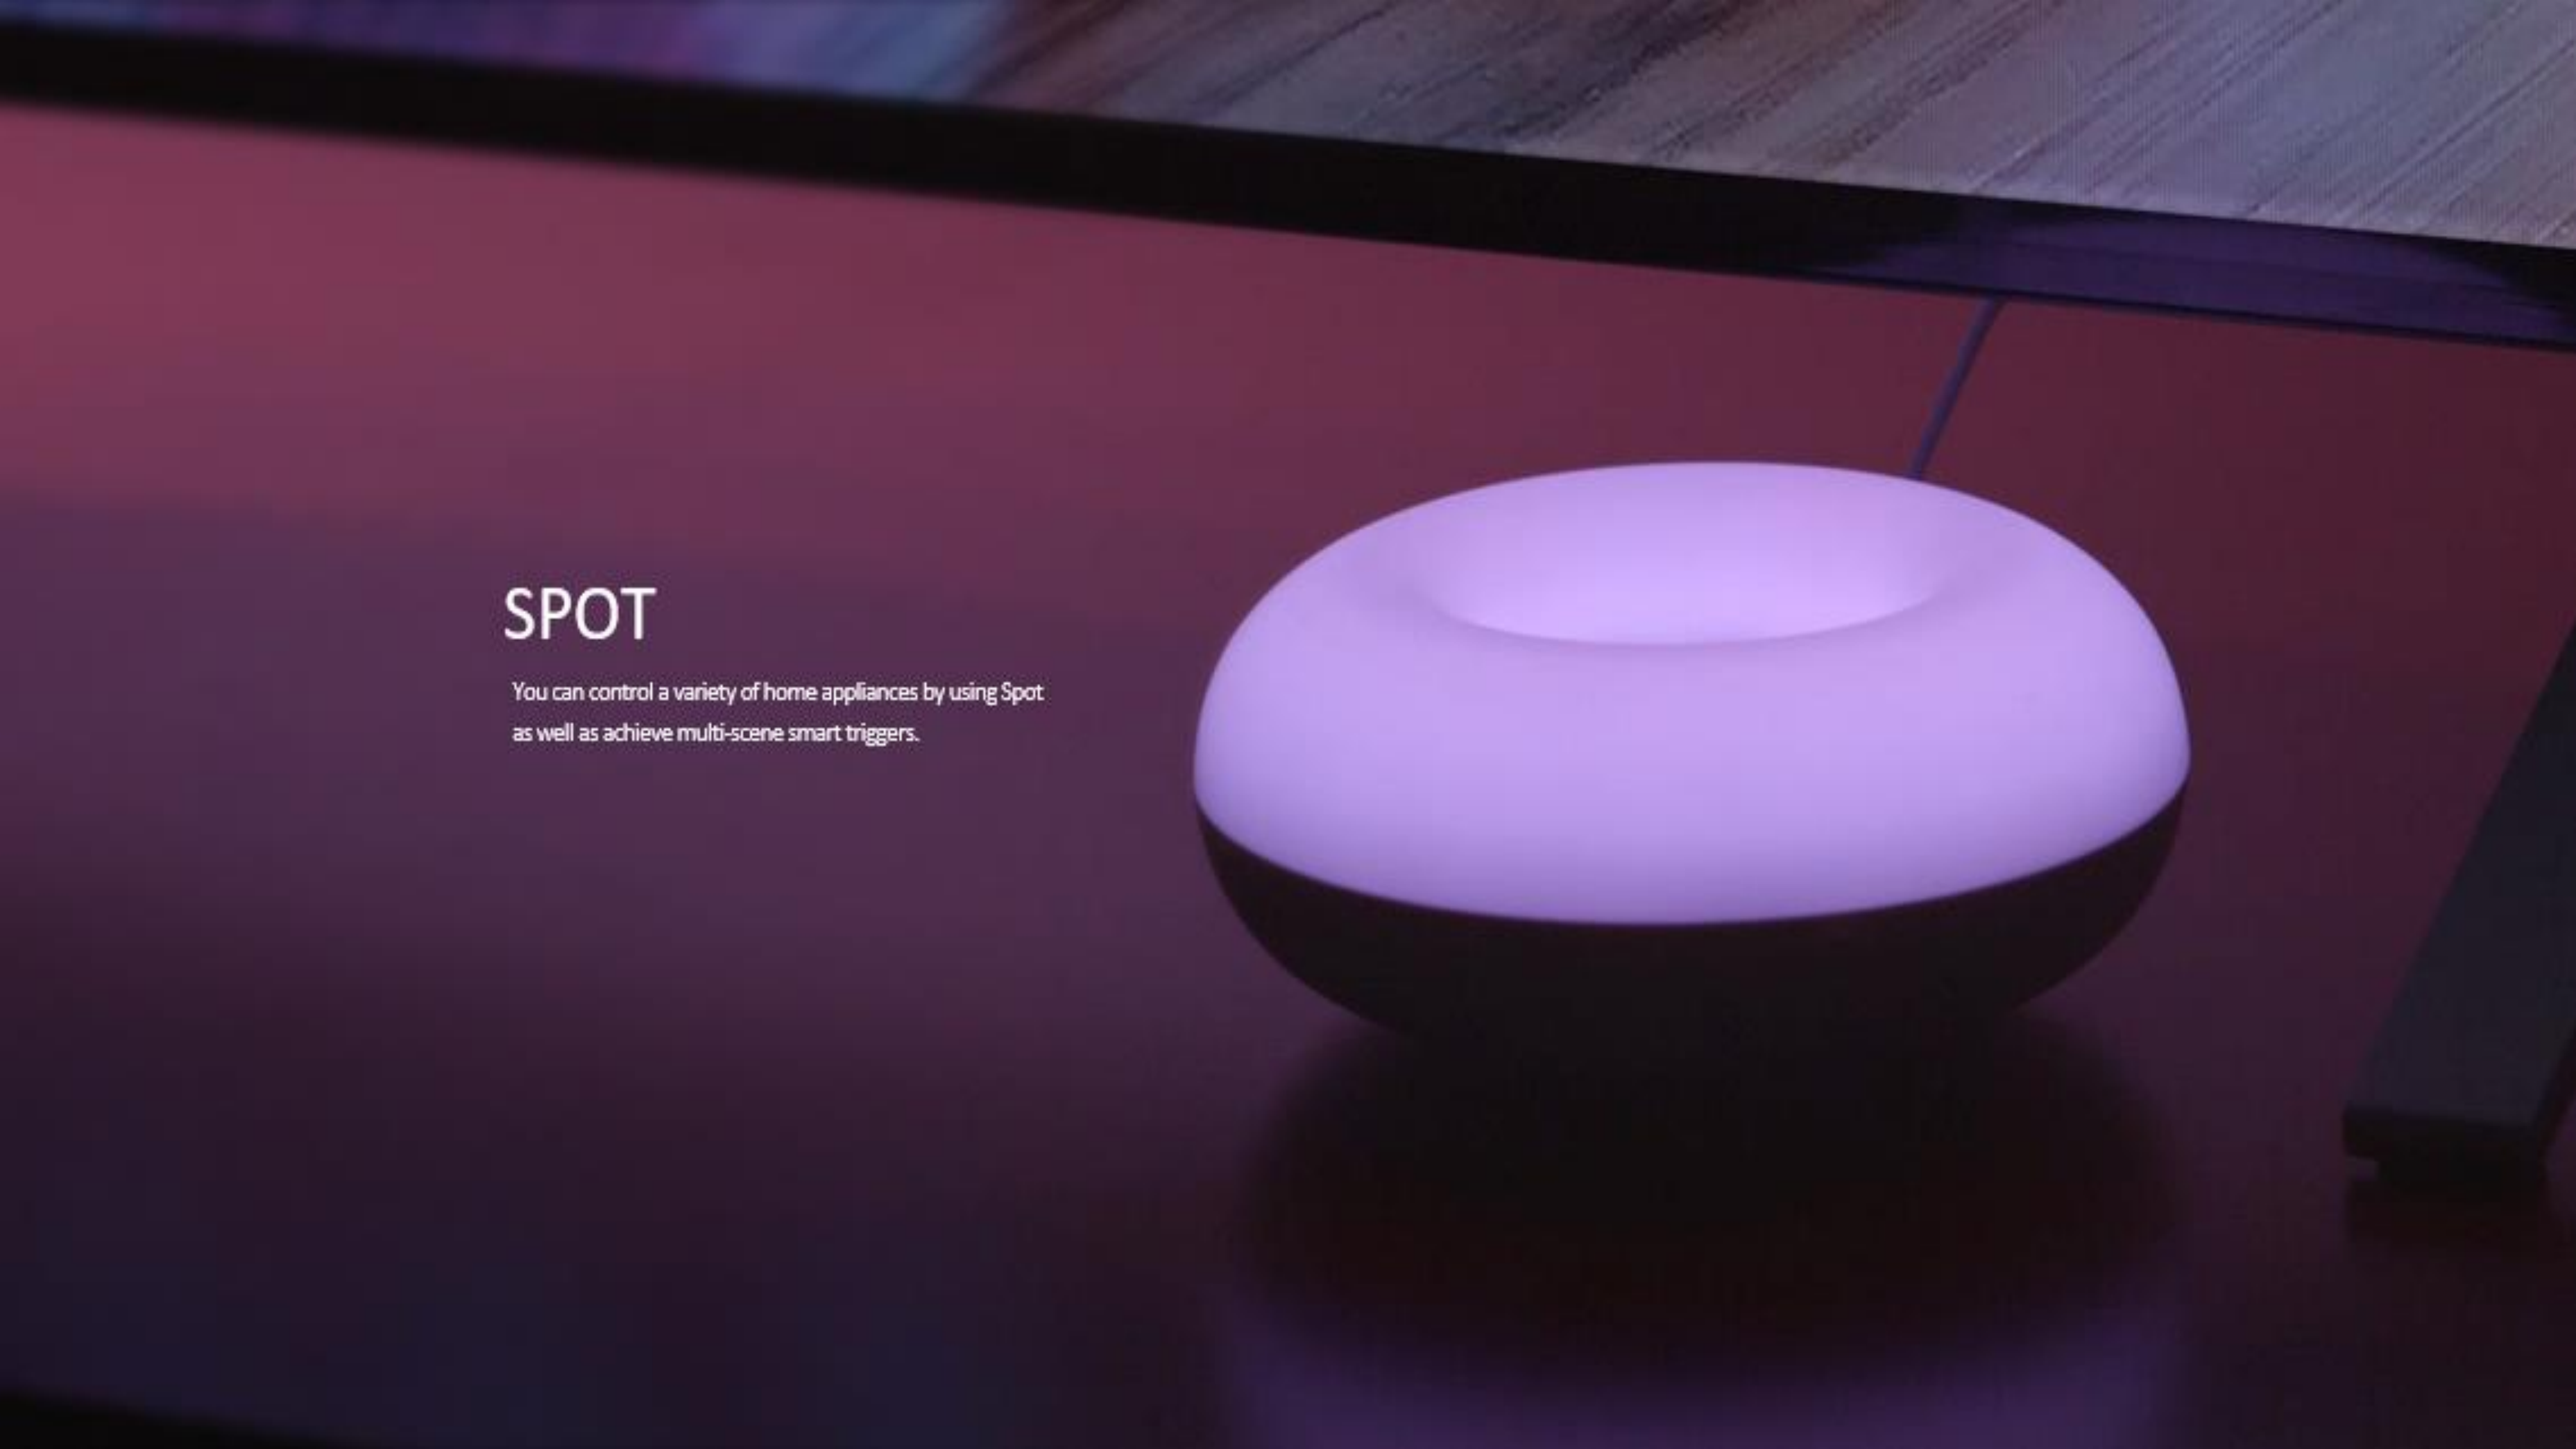
Video Smart Door Lock

Smart Door Lock has multiple ways to open, prying alarm, remote monitoring, etc.

DESIGN AWARD 2018

FRAME 360

360° rotation, panoramic view and innovative fuselage separation design enables easy moving



SPOT
You can control a variety of home appliances by using Spot
as well as achieve multi-scene smart triggers.

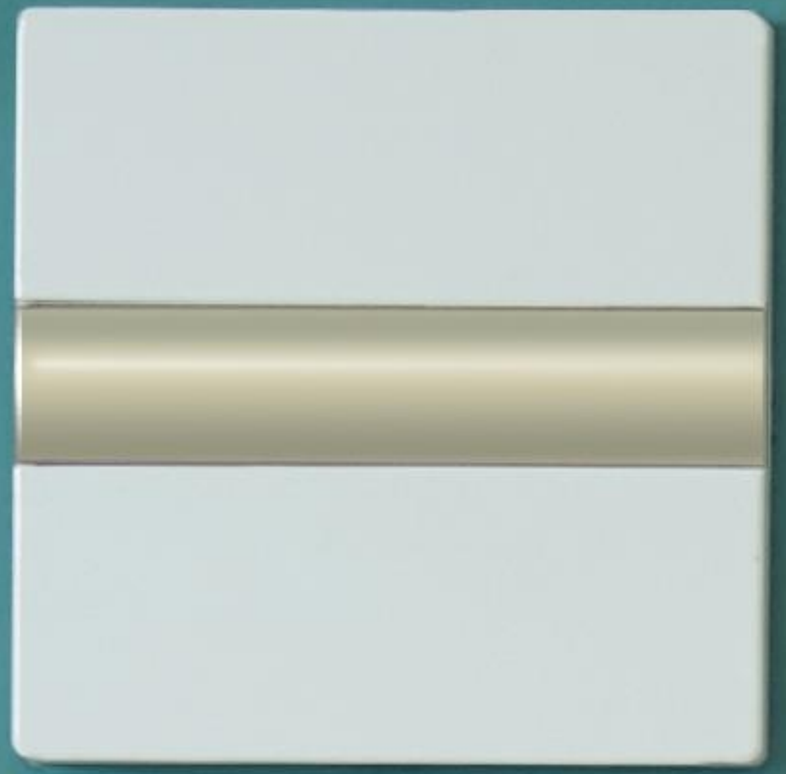
CUBE Switch Module

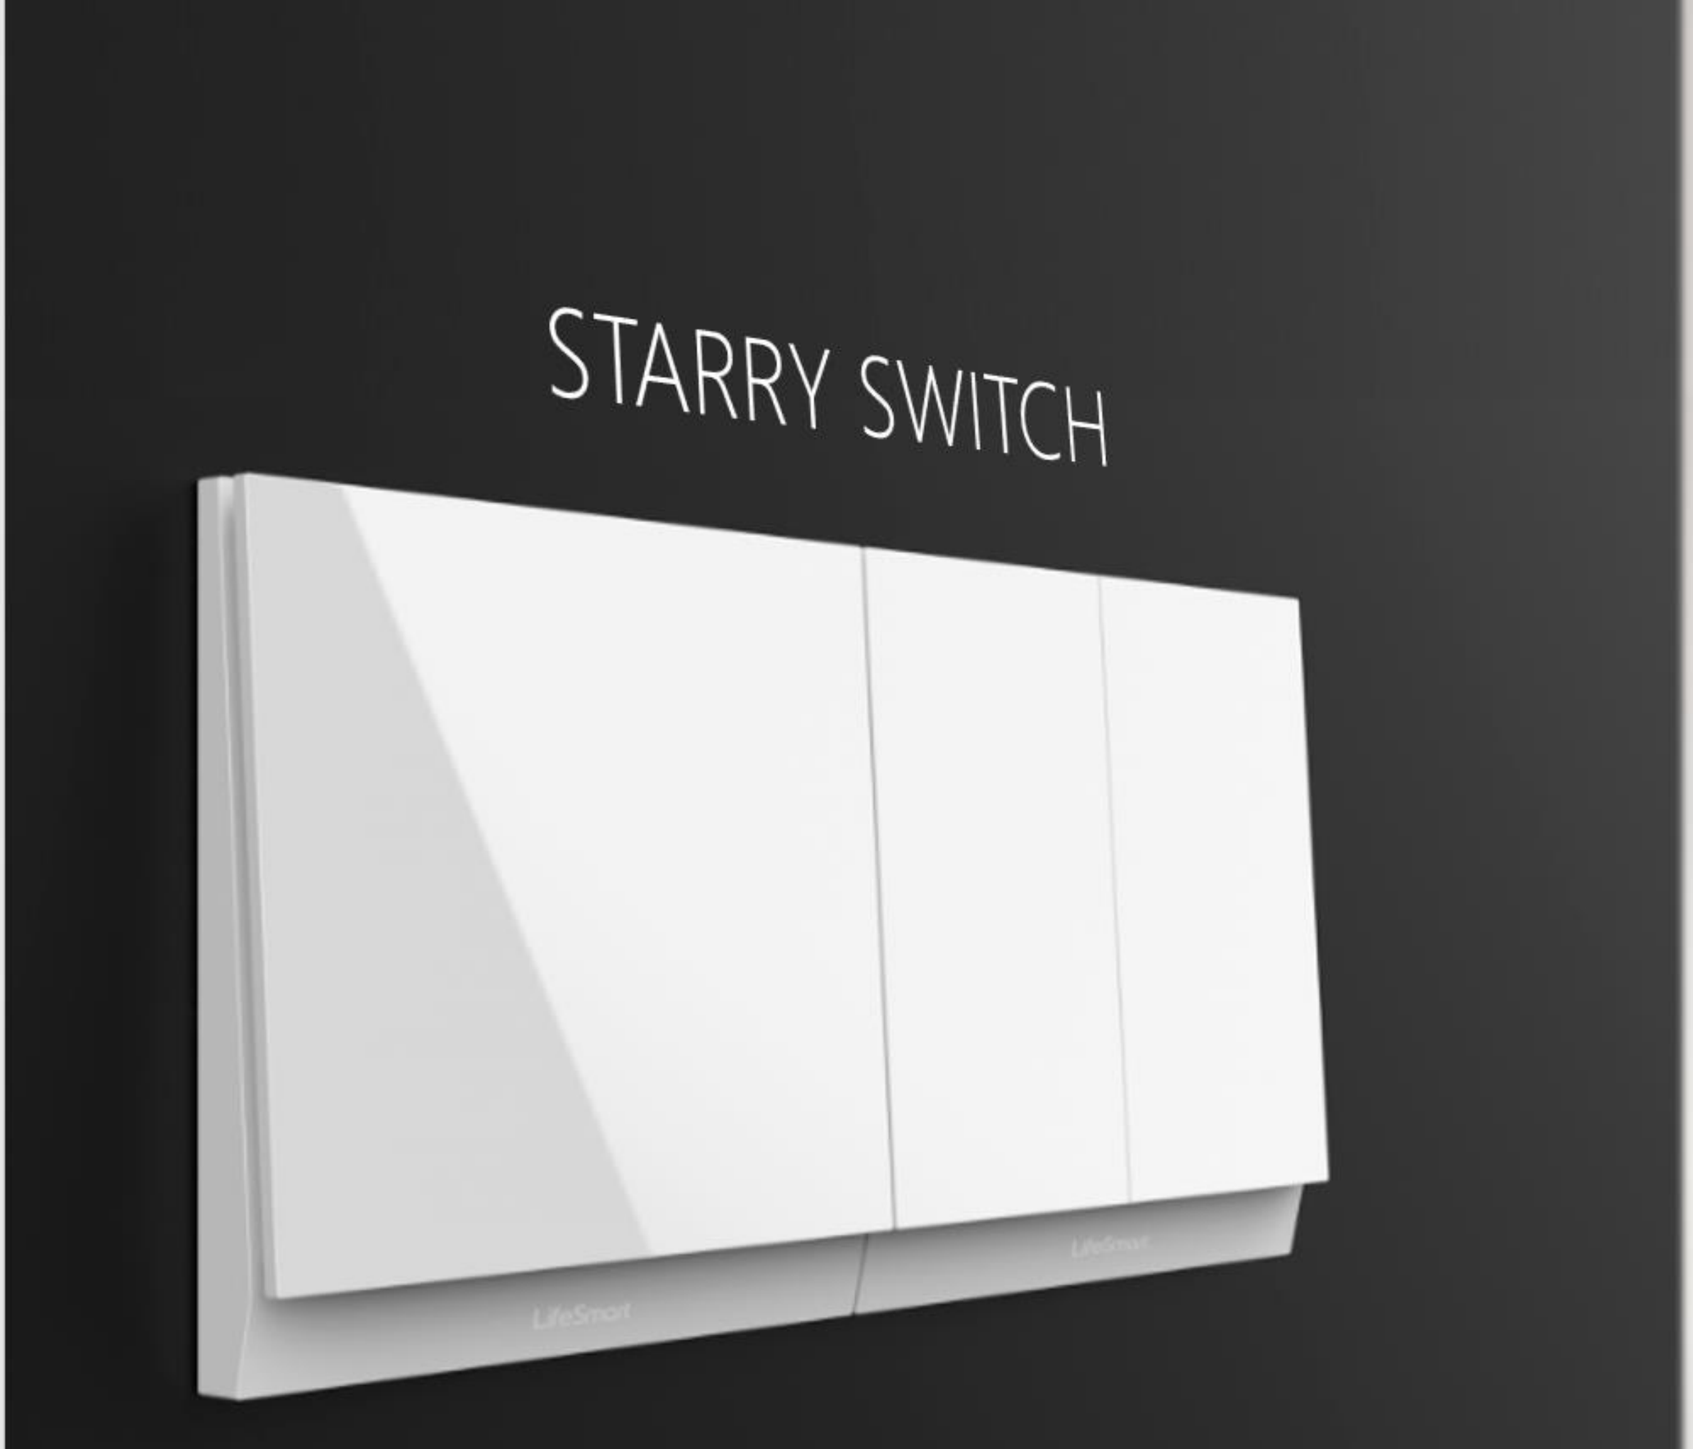
Make Traditional Switch Be Intelligent

Stellar Switch

Perfectly Upgraded Single-Fire Smart Switch

- Independent Power Supply
- No Flickering
- Wireless Dual Control
- Easy to Upgrade





Safe and Stable Single Wire Smart Switch

- No flicker, safer and more stable
- Wireless double control, place as your wish
- Easy to upgrade, no extra wiring
- Remote control, voice to turn on/off
- Intelligent scenes linkage, enjoy the convenience

CUBE SENSOR SERIES

Elegant small sensors are distributed throughout your whole-house. They has the most amazing ability to just melt into the background and remain unnoticed.

Cloud Service

CRM Customer Relationship Management System

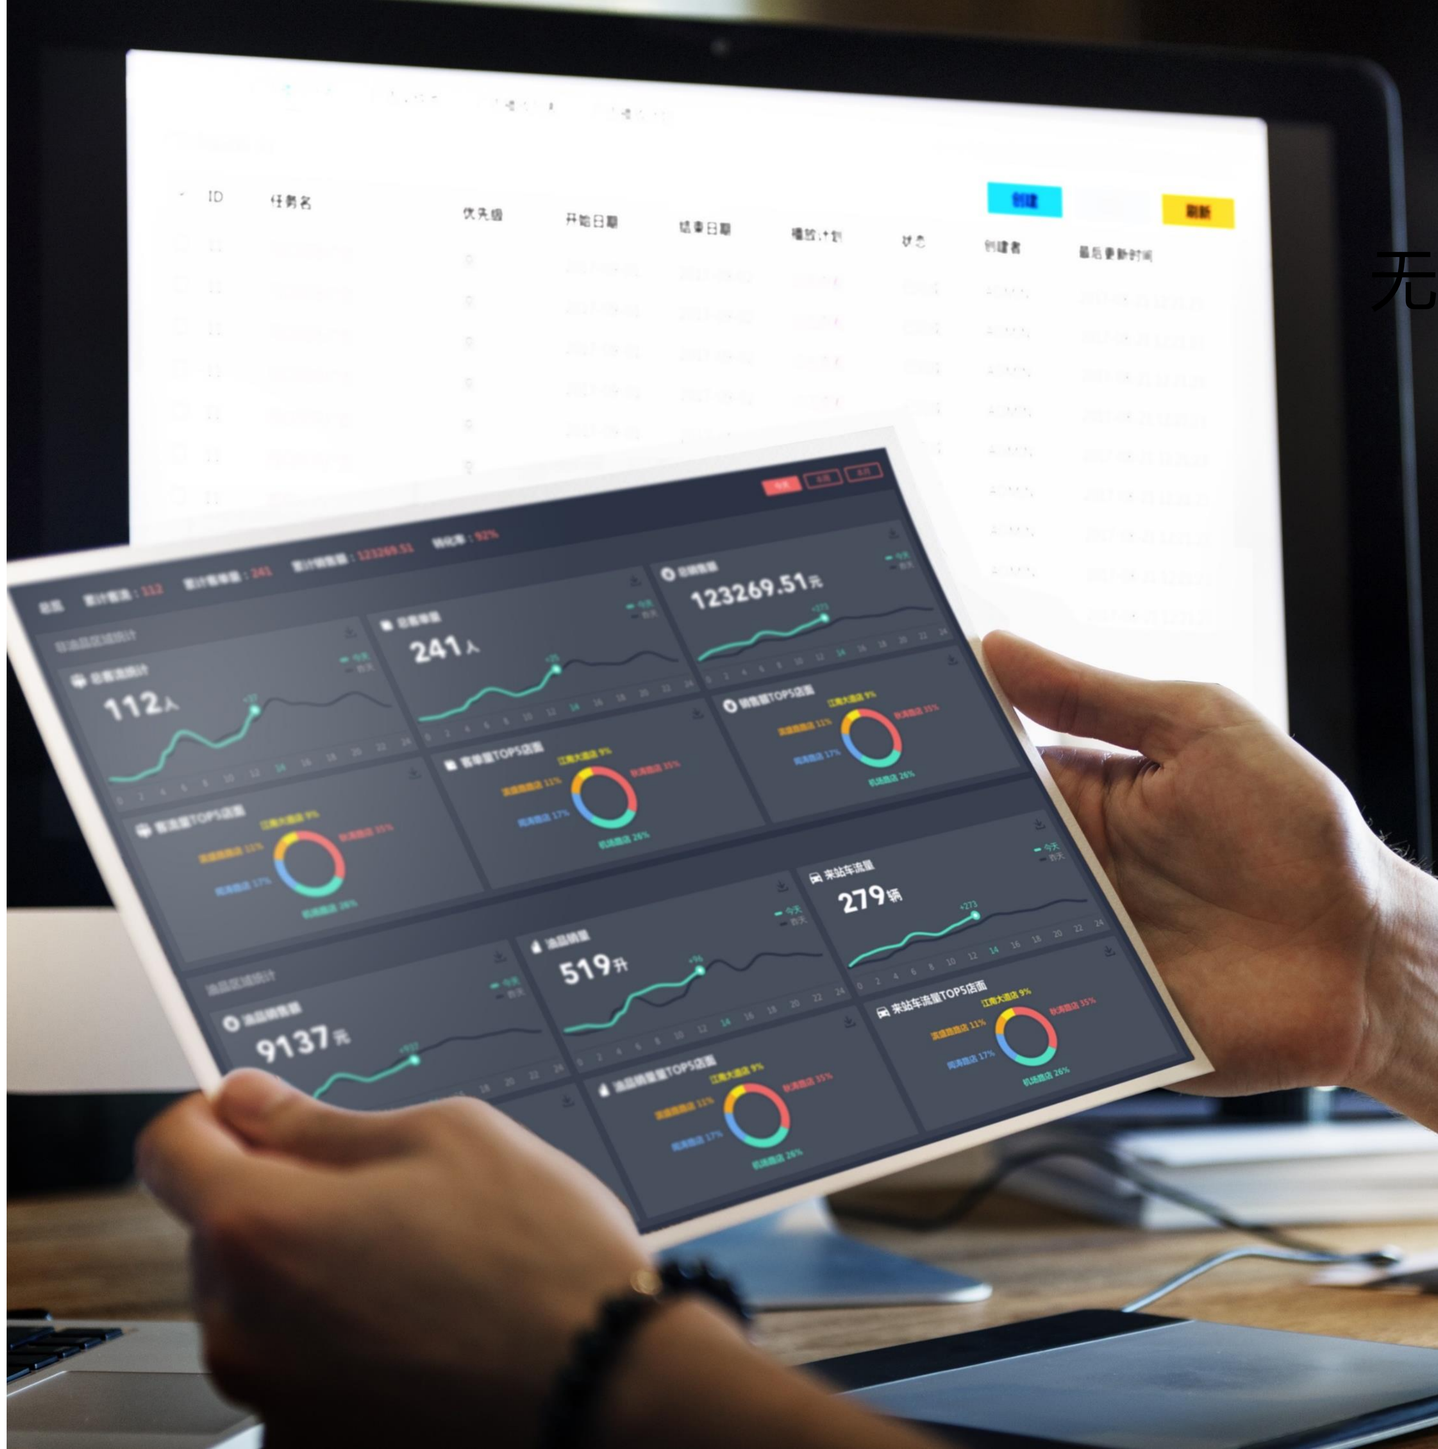
To help Group customers to achieve background management, data analysis, brand operations, marketing and other customized needs, to provide customer relationship management, market operations and value-added services in one of the cloud ecology.

Open API Cloud Platform

LifeSmart Cloud Platform provides external equipment add, search, status query and control services. Third-party applications can access the cloud platform through HTTPs protocol to complete the management of the device.

Developer SDK

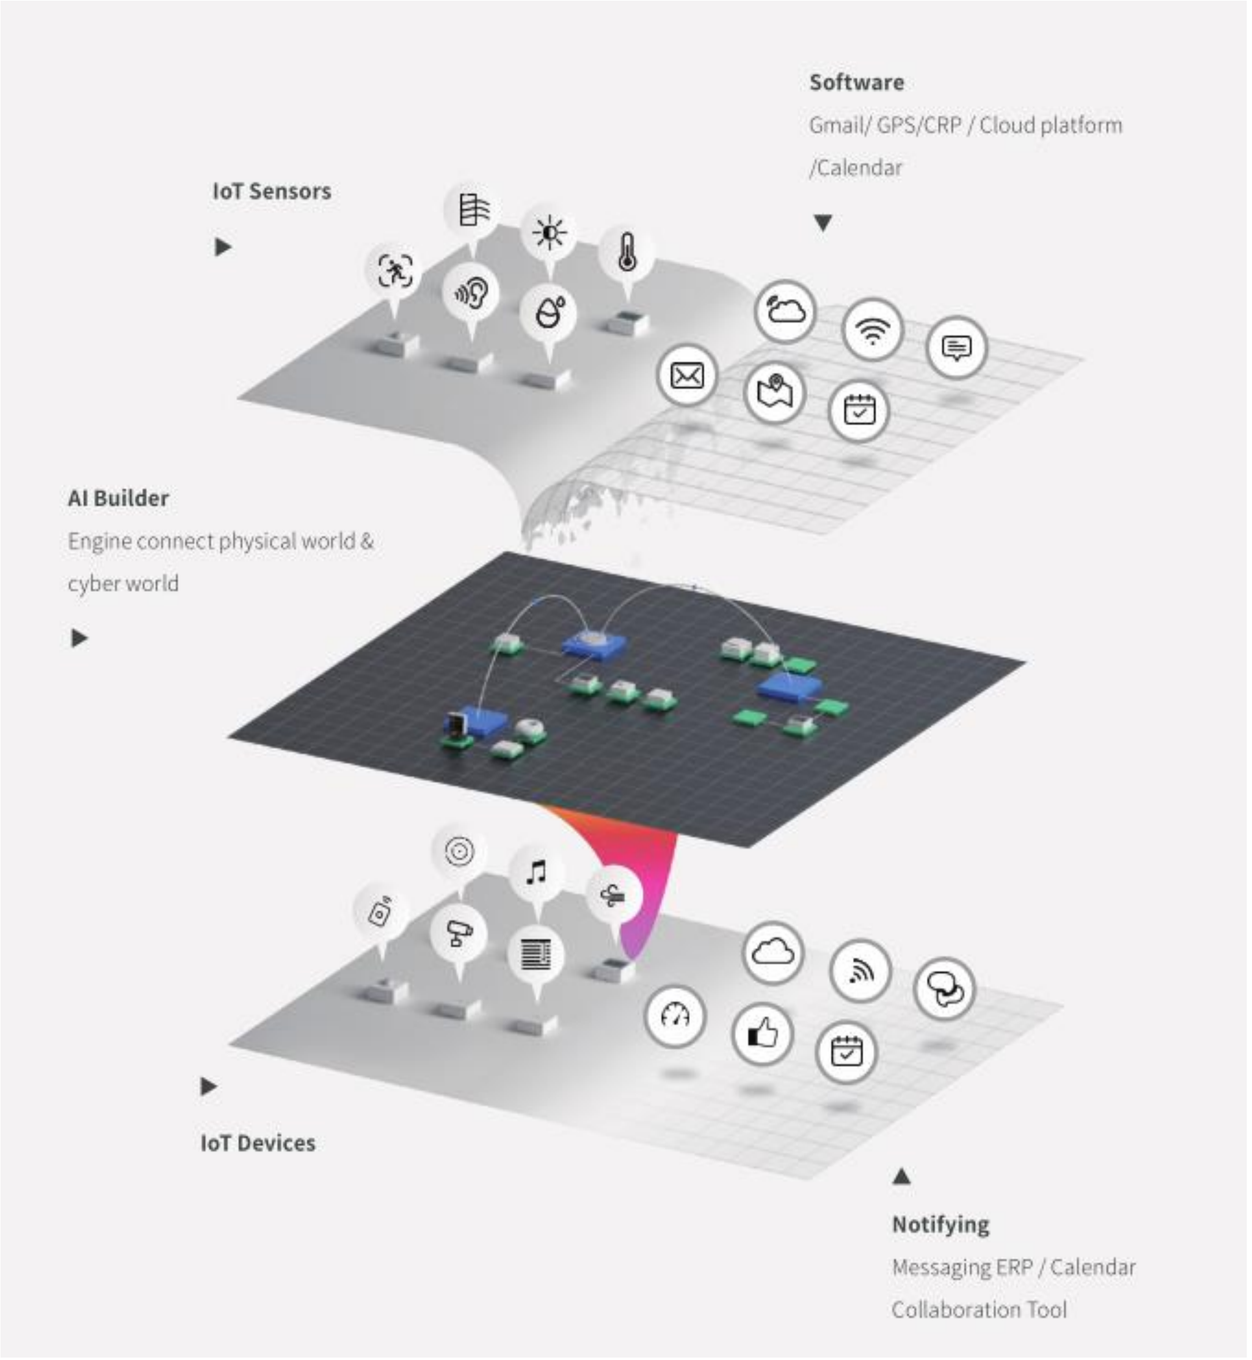
LifeSmart is open-minded to face the multi-state needs of partners, regulate cloud-to-cloud docking solutions, so that partners can more easily intervene in the LifeSmart ecosystem.



AI Builder

Logic AI Engine

AI scene system refers to the actual intelligent needs, free to add and set up a variety of intelligent devices and sensors, the linkage between various devices constitute a smart scene. AI data system refers to the situation that has been set up intelligent scene, but the actual use is inconsistent with pre-set, then the system will automatically adjust the original intelligent scene logic according to large data calculation, to provide more user-friendly intelligent services. LifeSmart AI systems creatively use the "logic and data" model to achieve the perfect combination of smart home and artificial intelligence.



Smart Voice Ecosystem

LifeSmart Smart Home System supports Amazon Alexa, Google Home, Apple HomeKit, Duer OS (Xiaodu at Home), Ali Genie (Tmall Genie), Tencent Cloud Xiaowei, MI, Tic, Rokid, iFLYTEK and other voice control entrance.

LifeSmart works on designing, researching and developing senseless interaction products to make voice control available so that you can not only free your hands, but also make a big step across the senseless interaction.

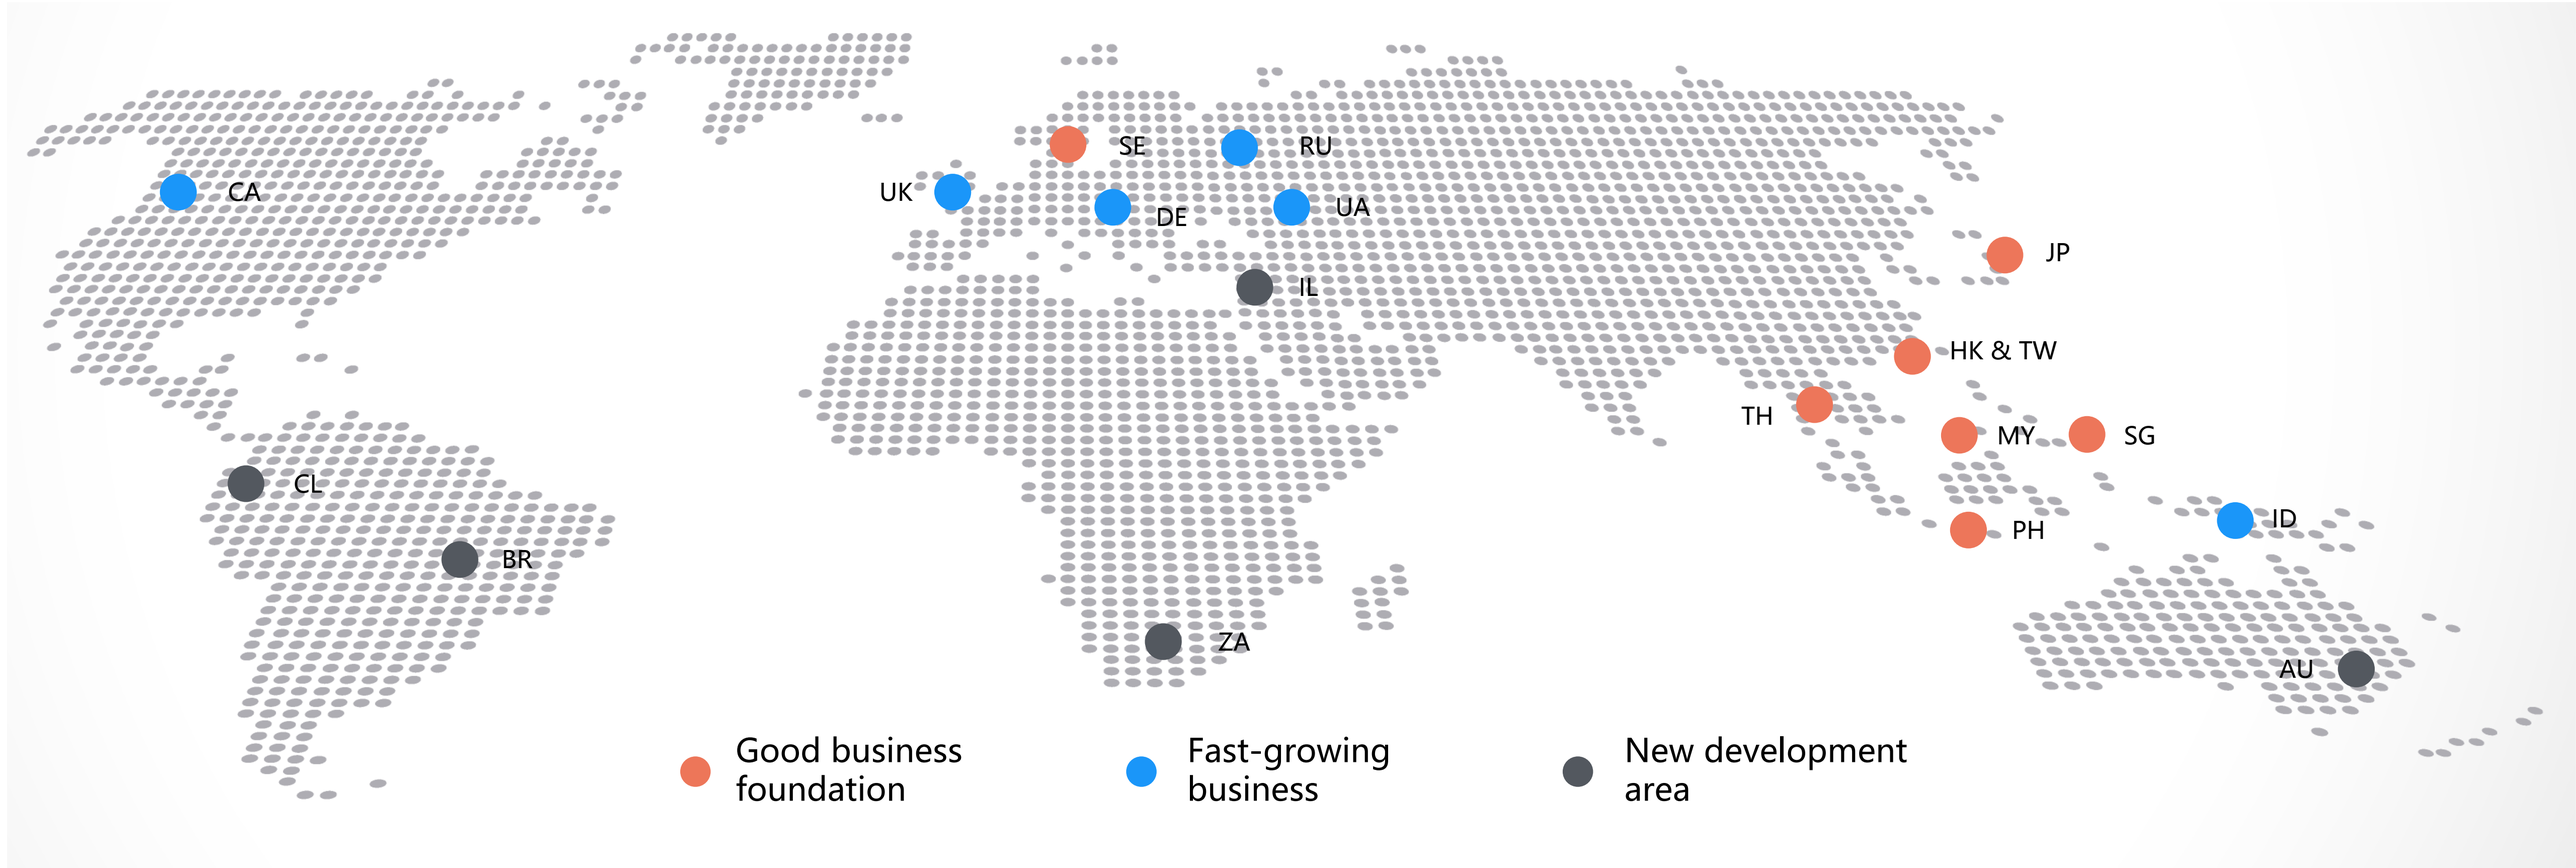
Global Brand Positioning

Since its inception, LifeSmart has taken deep roots in China with a global vision, working to grow into a Chinese brand with worldwide influence;

So far, we have realized sound development in Southeast Asia, and have built a well-established service system, thus wining the trust of real estate giants and important clients, such as Japan's LIXIL, Thailand's SC Assets, and others;

We have also built an initial marketing network together with partners across Europe and North America, which enjoys fast growth. We have joined hands with local install networks and real estate developers to boost the development of local smart home business.



LIXIL

Link to Good Living

As Japan's largest real estate service and building material provider, LIXIL has adopted LifeSmart's product solutions to build a whole set of smart home services "U² home", which fits its business and local services.

INVALANCE

As a major real estate service provider in Japan, INVALANCE currently owns 100-plus high-end service-oriented apartments in Greater Tokyo, mainly targeting high-end clients with investment purpose; in the ever-growing IoT field, INVALANCE has teamed up with Casper AI, an American AI firm, and China's IoT company LifeSmart to build Alyssa, a smart home service platform serving Japanese clients;

New Retail

Official Flagship Store

With distinctive shop design, the official flagship store has enduring appeals and has realized huge customer flow and efficient conversion, which enables superb user experience and brings high transaction volume.

Experience Zone in Flagship Store

We have designed three typical home-use scenarios in our flagship store (entryway, bedroom, and living room), where fully intelligent presentation process is available to enable users to experience the convenience brought by automation.

Standardized Display Board

Modular panels, which are easy to distribute and install, are used to help dealers to build sales system quickly.

Sand Table

Face-to-face, interactive sand table on site is enabled through voice speaker, making clients feel the charm of smart home visually.

Sichuan Telecom Buying Conference

Intelligent sand table gathered spotlight

Intelligent sand table in a service hall

Smart home exclusive shop

Intelligent sand table is used as a display and sales tool

LifeSmart Exhibition Car

The mobile "smart home showroom" is equipped with a full range of smart home products and a variety of speakers, which can display smart home scenarios anytime anywhere. It has led the way in helping partners in presentation and report, and in promoting market activities and ground marketing.

Every single home will become a smart home
Every single office will become a smart office
